

Host offer in Ethiopia for a Plant Scientist affiliated with the German academic system

As a Humboldt alumnus, I am pleased to offer host opportunities in Ethiopia for plant scientists who are affiliated with the German academic system. The Alexander von Humboldt Foundation's initiatives, the Feodor Lynen Research Fellowship enables outstanding German postdoctoral researchers and experienced scholars to undertake research projects abroad within the Humboldt Network. This fellowship supports scientific excellence and deepens global collaboration. Full details of the program can be found through the Alexander von Humboldt Foundation.

[Feodor Lynen Research Fellowship – Humboldt Foundation](#)

Postdocs: 6–24 months, applicants must have obtained their PhD within the past four years

Experienced researchers: 6–18 months (can be split into up to three research stays within three years)

I would be delighted to host a plant scientist affiliated with the German academic system who wishes to pursue collaborative research in key areas including:

- Plant community interactions and adaptation in a changing climate
- Ecology of seeds: dispersal, dormancy, and germination
- Biological invasions: mechanisms, impacts, and management
- Ecological dynamics of medicinal plants and their secondary metabolite production

Application deadline: Applications accepted year-round.
