

Diversity of chemical and molecular signaling networks in plant-microbe interactions

Eduard Strasburger Workshop

The workshop is for PhD students and postdocs working on diverse topics of plant-microbe interactions (symbiosis and pathogenicity). The workshop covers the three following aspects:

- i) Microbial diversity in the context of plant-microbe interaction
 - ii) Chemical and molecular biology of plant-microbe interaction
 - iii) Evolution of plant-microbe interaction
-

Date: 03.-05. February 2020

Maximum number of participants: 26

Location:

Königswinter (AZK), Johannes-Albers-Allee 3, D-53639 Königswinter
Bildungs- und Tagungshaus am Rhein, Arbeitnehmer-Zentrum

Application opens: 30.10.2019

Application closes: 20.12.2019

Registration at <https://chemolpmi.wordpress.com>

Invited speakers:

Caroline Gutjahr, Technical University of Munich (TUM)

Dominik Begerow, Ruhr-University Bochum

Eva H Stukenbrock, University of Kiel & MPI Plön

Pernille Thorbek, BASF

Deutsche
Botanische
Gesellschaft

Organizers:

Sophie de Vries und Janina von Dahlen,
Lena Steins, Sebastian Klenner and Tom Maus
